

Start

Timeline overview - this is the last meeting. There is an office hour on nov 14

Agenda:

Data Sets & Access

- Data sourced from CMI-PB and External experiments.
- Quality control (Normalization, Feature filtering, Batch Correction, Harmonization)
- Raw and processed data is available
- Training contains vaccine response + baseline, testing only baseline

Revision of the tasks:

- You may freely choose which tasks to attempt
- Optional Bonus task about Th1/Th2 polarization ratio

Submission Process

- Create account of website
- Click on submit prediction
- Follow the instructions
- You can look at and update submissions until the end, by simply uploading new ones.

Evaluation

- Empty fields will be filled by median

Prizes

- Anyone with 1+ significant evaluation counts as a co-author

Q&A Section

1: one or multiple submissions per team? also, are prizes split?

You can submit multiple submission and 1 person can be on 3 teams max

2: How are the batch corrected data sets built?

Answer is irrelevant for us

3: Do we use the median value at a certain time point for the imputation?

Idk didn't catch that

4: Is the Imputation per cohort?

Yes

5: Is Imputation for training and challenge?

Imputation is only necessary for training
